

Tech Lightweight Concrete

June 2008

“Community Involvement”

Tech Lightweight Concrete has been vested in the community of Milton, Washington, for years, so it was an honor to take part in the Veteran’s Memorial project.

The Memorial has been nationally recognized for receiving the “Fred C. Hall Memorial Outstanding Post Special Project Award for 2007-08.” (VFW Post 11401)

Veteran’s Memorial Project

Milton, Washington, has a new Veteran’s Memorial which was nationally honored in Washington D.C. in March, 2008. The five columns, built by Tech Lightweight Concrete, each stand for a different branch of the military. The team who headed up this project used a rebar frame which they wrapped in wire mesh. They welded the brass-plated plaques, each one with the symbol of their branch of the military, on the

pillars. They then mixed standard cement with Accrel 60 and layed it over these pillars. The columns were textured with cement using paint brushes. “Green Slate” and “Grey Slate” acrylic dyes were used for color and they were sealed with an anti-graffiti blocker guard. These pillars stand today at Triangle Park in Milton where Veterans can come to remember and be remembered.

Fit For Work® Policy

Tech Lightweight Concrete is incorporating an improved policy. The United States Department of Transportation has adopted a rule that mandates drug and alcohol testing in the workplace. Our employees will now be tested regularly in order to comply with the Drug-Free Workplace Act. We base our company on condition and conduct and make sure our employees know the difference. Condition deals with physical illness, emotional distress, and chemical dependency. Conduct is irresponsible behavior and unsafe or unproductive work. We want to make sure that our company employs people who are the best they can be in both areas, and we want you to feel safe knowing that when we send out our best to complete your requested job, they will work to the best of their ability in a timely, productive manner.

Contact us for an estimate on your construction project or if you would like more information on our products and services.
